Red Hat Recruitment Team

Red Hat Canada Ltd
90 Eglinton Avenue East, Suite 502
Toronto, ON M4P 2Y3

Application for Software Engineer Internship

To whom this may concern,

About Me

I'm a 3rd year CS student who's deeply passionate about everything Linux and FOSS. I have been using Linux for 2 years now and have been running Arch Linux as my daily driver for the last year. I am constantly tinkering with open-source software and am always working on side projects.

Why Red Hat?

As someone who uses 99%+ open-source software on their desktop/server, I would love to work for a company that does so much for the community. For many students, they dream of working at one of the Big 4 tech companies; my dream is to work for Red Hat. With the recent acquisition of Red Hat for \$34b, it is clear that Red Hat is *the* leader in the open-source industry, and I would love to dedicate my enthusiasm for FOSS towards the company.

Why Me?

First, I have a solid foundation of software development knowledge from my dedication to coursework, side projects and Linux usage. Next, I am well-versed in the collaborative development process from closely following various projects and taking the lead as project manager in group projects. Finally, I am eager to learn and pick up new technology and skills that will benefit me for the rest of my career.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kevin Mok'.
